Logan Schelly

(951) 692-8802 • idyllogan@verizon.net

Objective

I have 2 years of experience in administration and research at a proprietary trading firm. I graduated in 2020 with a degree in applied math and a minor in computer science, and I paid for school by tutoring in the campus math lab.

Work Experience

Quantitative Researcher and Executive Assistant

Alamo, CA

Tanius Technology LLC

Aug 2020 – Aug 2022

- Futures market research for high-frequency trading strategies.
- Data visualization for both derivative traders and real estate fix-and-flips.
- Payroll, 401(k), compliance, and other administrative tasks for a company of 35 people.

Head Upper Division Tutor

Provo, UT

BYU Math Lab

Sep 2014 – April 2020

- Helped students on a first-come first-served basis.
- Tutored Linear Algebra, Multivariable Calculus, Differential Equations, and Mathematical Proof classes.
- Conducted weekly meetings to help our team of 10-20 upper division tutors prepare for that week's concepts.
- Coordinated exam reviews, and often taught them. 10 to 200 students attended, depending on enrollment and subject.
- Overhauled the tutor handbook.
- Expanded the tutor application test to include a Mathematical Proof section.

Applied Math TA

Provo, UT

BYU Math Department

Winter 2019

- 3 times a week I held office hours to help ACME juniors with their Optimization and Mathematical Analysis homework.
- \bullet Usually helped between 5 and 10 students.

Lube Technician

Provo, UT

Jiffy Lube

Summers 2015 and 2016

- Serviced up to 50 cars each day.
- Changed oil, rotated tires, replaced brake pads, checked and filled under-hood fluids.
- Performed basic inspections for wear and tear.
- Repaired windshield rock chips.

AVID Tutor

Hemet, CA

Hemet Unified School District

October 2013 – April 2014

- Worked as a tutor to students in Hemet High School's AVID program.
- Mentored groups of 4 to 6 students in any homework assignment they needed help with.
- Helped students identify root misunderstandings of concepts, instead of rote memorization.

Private Tutor

Hemet, CA

Self Employed

September 2012 – April 2014

• Tutored 6 different students individually. The students were in middle school and high school.

Gas Station Clerk Idyllwild Garage Idyllwild, CA

• Depending on the shift, would open or close the store.

- Stocked shelves and updated inventory.
- Dispensed propane for customers with tanks.
- Serviced customers and kept the store clean.

Landscape Maintenance Crewmember

K&M Strategic Management

Hemet, CA

Summer 2011 and May 2012 – January 2013

Summer 2011 and May 2012 – January 2013

- Leaf-blew the parking lots and picked up trash at managed medical properties every morning.
- Weeded, raked, and maintained the landscape at properties.
- Cleaned out an empty strip mall in preparation for sale.
- Repainted fences, parking lines, and breakrooms.

Education

Bachelors of Science in Mathematics

April 2020

Brigham Young University

GPA: 3.17 out of 4.0

- Applied and Computational Mathematics Emphasis (ACME)
- Computer Science Minor
- Recognized for outstanding performance in Mathematics in 2020 and 2018

Course Work and Topics • Fundamentals of Mathematics Set Theory - Proof Techniques Cardinality - Functions - Logic - Relations - Induction - Number Theory • Linear Algebra - Solving Linear Systems - Vector Spaces - Quadratic Forms - Matrix Algebra - Eigenvectors - Singular Value Decomposition - Inner Product Spaces - Determinants • Calculus of Several Variables Quadric Surfaces - Partial Derivatives - Vector Calculus Vector Functions - Multiple Integrals • Differential Equations - First Order Differential Equations - Laplace Transformation - Systems of First Order Linear Equations - Second Order Linear Differential Equations - Series Solutions of Second Order Equations - Numerical Methods • Theory of Analysis - Properites of the Real Numbers - Derivatives Sequences and Series - Sequences and Series of Functions - Topology of \mathbb{R} - Riemann Integration - Limits and Continuity of Functions • Mathematical Analysis - Abstract Vector Spaces - Contraction Mappings - Linear Transformations and Matrices - Daniell-Lebesgue Integration - Inner Product Spaces - Calculus on Manifolds - Spectral Theory - Complex Analysis - Metric Space Topology - Spectral Calculus - Fréchet Differentiation - Iterative Methods for Linear Systems • Algorithm Design and Optimization - Polynomial Approximation and Interpoloation - Measuring Algorithm Complexity - Data Structures - Unconstrained Optimization - Combinatorial Optimization - Linear Optimization - Probability - Nonlinear Constrained Optimization - Probabilistic Sampling and Estimation - Convex Analysis and Optimization - Dynamic Optimization - Random Algorithms - Harmonic Analysis - Stochastic Dynamic Optimization • Modeling with Uncertainty and Data - Markov Chains - Machine Learning - Classical Inference - Unsupervised Methods - Hypothesis Testing - Graphical and Latent Variable Models - Regression and Classification - Kernel Methods - Bayesian Analysis - Tree-Based Methods - Estimation in State Space Models • Modeling with Dynamics and Control - Existence and Uniqueness Theorem - Hamilton's Principle - Stability Theory - Noether's Theorem - Bifurcation Theory - Optimal Control - Partial Differential Equations - Pontryagin's Maximum Principle - Calculus of Variations - Linear Quadratic Regulators

Skills

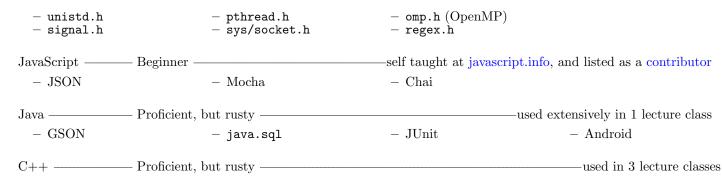

Programming Languages

- Euler's Equation

——— Proficient –

'rogramming Languag	ges		
Python — Very Comfortable —		used in 8 lab classes and 4 lecture classes	
NumPyScipyMatplotlib	SymPyPandasscikit-learn	pytestSeleniumBeautiful Soup	- sqlite3

-used in 2 lecture classes

Other Tools

- LATEX- Proficient
- Spreadsheets Proficient

- Git Intermediate
- HTML Beginner

Soft Skills

Tutoring • Attention to Detail • Troubleshooting • Public Speaking • Leadership • Project Coordination

Projects

Math Lab Student Sign Up Analysis

Fall 2019 – Winter 2020

- Consolidated data spread across 60+ Excel files.
- Used Pandas to analyze the almost 900,000+ instances of students signing up for tutor help.
- Identified busiest times of the week, and the topics students most often came in for help with.
- Advised scheduling more tutors in the mornings based on my findings.

HTTP Proxy Winter 2020

- C program that relayed user requests to end server, and relayed server responses to user.
- Used regex.h to verify that user requests met HTTP formatting requirements.
- Handled concurrent requests with a threadpool using pthread.h and semaphore.h.

DNS Stub Resolver Winter 2020

- Program interfaced with DNS servers to look up IP addresses associated with a web domain name. For example, it would figure out that the domain name www.example.com is associated with IP address 93.184.216.34.
- Formatted queries to DNS standards, sent the queries with UDP, and then decoded responses.
- Written C with unistd.h, sys/socket.h, arpa/inet.h, and netinet/in.h.

OpenMP with Mandelbrot Set

Winter 2020

• Parallelized the Mandelbrot visualization code posted on github by Andrej Bauer.

Tiny Shell Winter 2020

- Wrote a simple shell that could handle process creation, I/O redirection and pipelines, and process control.
- Used C with unistd.h and signal.h.

Inverted Pendulum Control

Winter 2019

- Modified the Python code from the CartPole-v1 environment of OpenAI's gym library.
- Updated from Euler's method to Runge-Kutta.
- Applied an LQR control scheme to keep the pendulum upright.

Android App – Family History Map

Summer 2018

- Wrote both the client and server in Java.
- Displayed family history data with a Google MapFragment.
- Implemented activities for log-in, map interaction, life event details, and app settings.
- Wrote the SQL commands that the server would use to store and retrieve user data.
